# Speed Test Instructions

(This is used to test wi-fi speed before setup of Blackbox Tv)

*\*Make sure you turn your wi-fi ON and data OFF to test\**

1. Choose the device you are going to test with(Phone/Tablet) and go to your Google Play/Apple App store and type in: Speedtest by Ookla
2. Once you see the app that looks like the one above, click it and download it to your device.
3. Once it is downloaded and on your phone/tablet, Open the App. You should see a Go button. Click it.
4. Once it is finished, it will give you a Download/Upload speed. Screenshot or write down the data and send it to me.
5. You will need a minimum of 30 mgbps download speed to successfully run Blackbox TV. Run the Speed test beside any Tv you are considering adding our services on. If you have any Tv that has less than 30 mgbps, you will need to contact your internet provider and see can you upgrade to a faster speed. In some cases, you may have to switch to another provider.
