Firestick Tv Setup Instructions

Want to program your firestick remote to control your tv?

* This may not work on all tvs, but will work on most.*

1. Press the Home button on your remote.
2. Go across the top and click on Settings.
3. Scroll over and click on Equipment Control
4. Move over and click on Manage Equipment.
5. Scroll down and click on Tv, then click on Change TV.
6. A warning will pop up, click Change TV, to continue.
7. If should automatically detect your tv. If not choose your tv by scrolling down the listing and click on it.
8. Press the power button, once prompted on the screen. Wait for 10 seconds then press the Power button to turn the tv back on.
9. You will now do a Volume test. Once prompted, turn the volume up or down, to make sure it is working with the remote.
10. You should see a completed screen. This will end the programming of your remote. Reprogram if necessary.

Having problems connecting your old Firestick remote?

1.Replace batteries.(in remote) 2.Get within 12 inches from your firestick. 3.Press and hold home button for 10 seconds. This should now pair with firestick, and should work.
